

PROFILE

Computer Science at Université Paris Cité, specializing in **Artificial Intelligence and Data Analysis** (M2 - Data, Knowledge & Intelligence track). Experienced in building end-to-end data pipelines, NLP systems, and machine learning models in professional environments. In addition to my academic background, I regularly practice chess, piano, golf and tennis

EDUCATION

Master's Degree in Computer Science
Université Paris Cité - M2: GPA 14,03/20
2024-2026

Bachelor's Degree in Computer Science
UQAC, Canada - L3: GPA 3,27/4,3
2023 - 2024 Double degree with Université Paris Cité

Bachelor of Technology in Computer Science (BUT)
Université Paris Cité
2021 - 2024

LANGUAGES

French : Native

English : B2 Level

Quentin Wendling

Data Analyst & Data Scientist Master's in Computer Science

Affiliated with the Graduate School of Artificial Intelligence & Data Science - Université Paris Cité

MAIN SKILLS

Data Science

- Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch

Programming & Data

- Python, SQL, R, Java, C/C++, Rust

NLP & LLMs

- Hugging Face Transformers, CamemBERT, Gemma, text classification, sentiment analysis, clustering

Backend & Databases

- Flask, FastAPI, PostgreSQL, MySQL, MongoDB, SQLite

Cloud & Tools

- AWS, GCP basics, Git, Matplotlib, Seaborn

PROFESSIONAL EXPERIENCE

Société Générale Assurances | La Défense, France

Data Analyst & Data Scientist Internship April - September 2026, ongoing

- Developing Python pipelines to automate training evaluation processing and replace manual workflows.
- Building KPI dashboards to track CSAT and feedback trends.
- Developing clustering-based comment analysis to group similar feedback and identify recurring themes.
- Using Gemma 2B-IT to generate interpretable cluster labels for business teams.
- Implementing and fine-tuning CamemBERT for domain-specific label classification.
- Contributing to an end-to-end NLP pipeline producing automated insight reports for training teams.

Groupe Conseil Filion | Québec, Canada

Data Science & Industrial Simulation Internship April - June 2024

- Analysis of logistics data from an industrial production chain
- Modelling and flow optimization using AI algorithms
- Design of simulations to evaluate different decision scenarios
- Measurable improvement in system performance and modularity
- Collaborative work in an Agile environment

LIPADE | Paris

Data & Backend Internship April - June 2023

- Processing and structuring data from medical images
- Backend migration from PHP to Python with Flask (MVC architecture)
- Implementation of a secure authentication system: Flask-Login, SQLAlchemy, role management and account validation
- Login interface (admin / user), session management and security
- JavaScript fixes (search bar, results page redesign) and UX improvements
- Knowledge exchange with researchers and hospital practitioners
